## Projects

### Personal Portfolio Site

<https://adamdupuy.github.io/personalSite>

- Created a **Kanban** board in **Jira** to organize my sprints and keep high quality **documentation**.
- Used **React** with **Typescript**, **MUI**, and **CSS** for the basic creation, logic, structure, and styling.
- Used story point estimation using the Fibonacci and scrum poker method.
- Gathered **User Feedback** on multiple aspects of the site to refine my design and structure.
- Created a portfolio site to display my projects, my story, and a way to contact me.

### Ink Paradise

<https://github.com/IkaikaL/ink-paradise>

- Contributed to a **Kanban** board in **Jira** to organize our sprints and keep high quality **documentation**.
- Used **React** with **Typescript**, **MUI**, and **CSS** for the basic creation, logic, structure, and styling.
- Used **API** calls to populate pages with real time data.
- Gathered **User Feedback** on multiple aspects of the site to refine our design.
- Created a manga reader site as a team with a focus on **User Experience** and unique features
